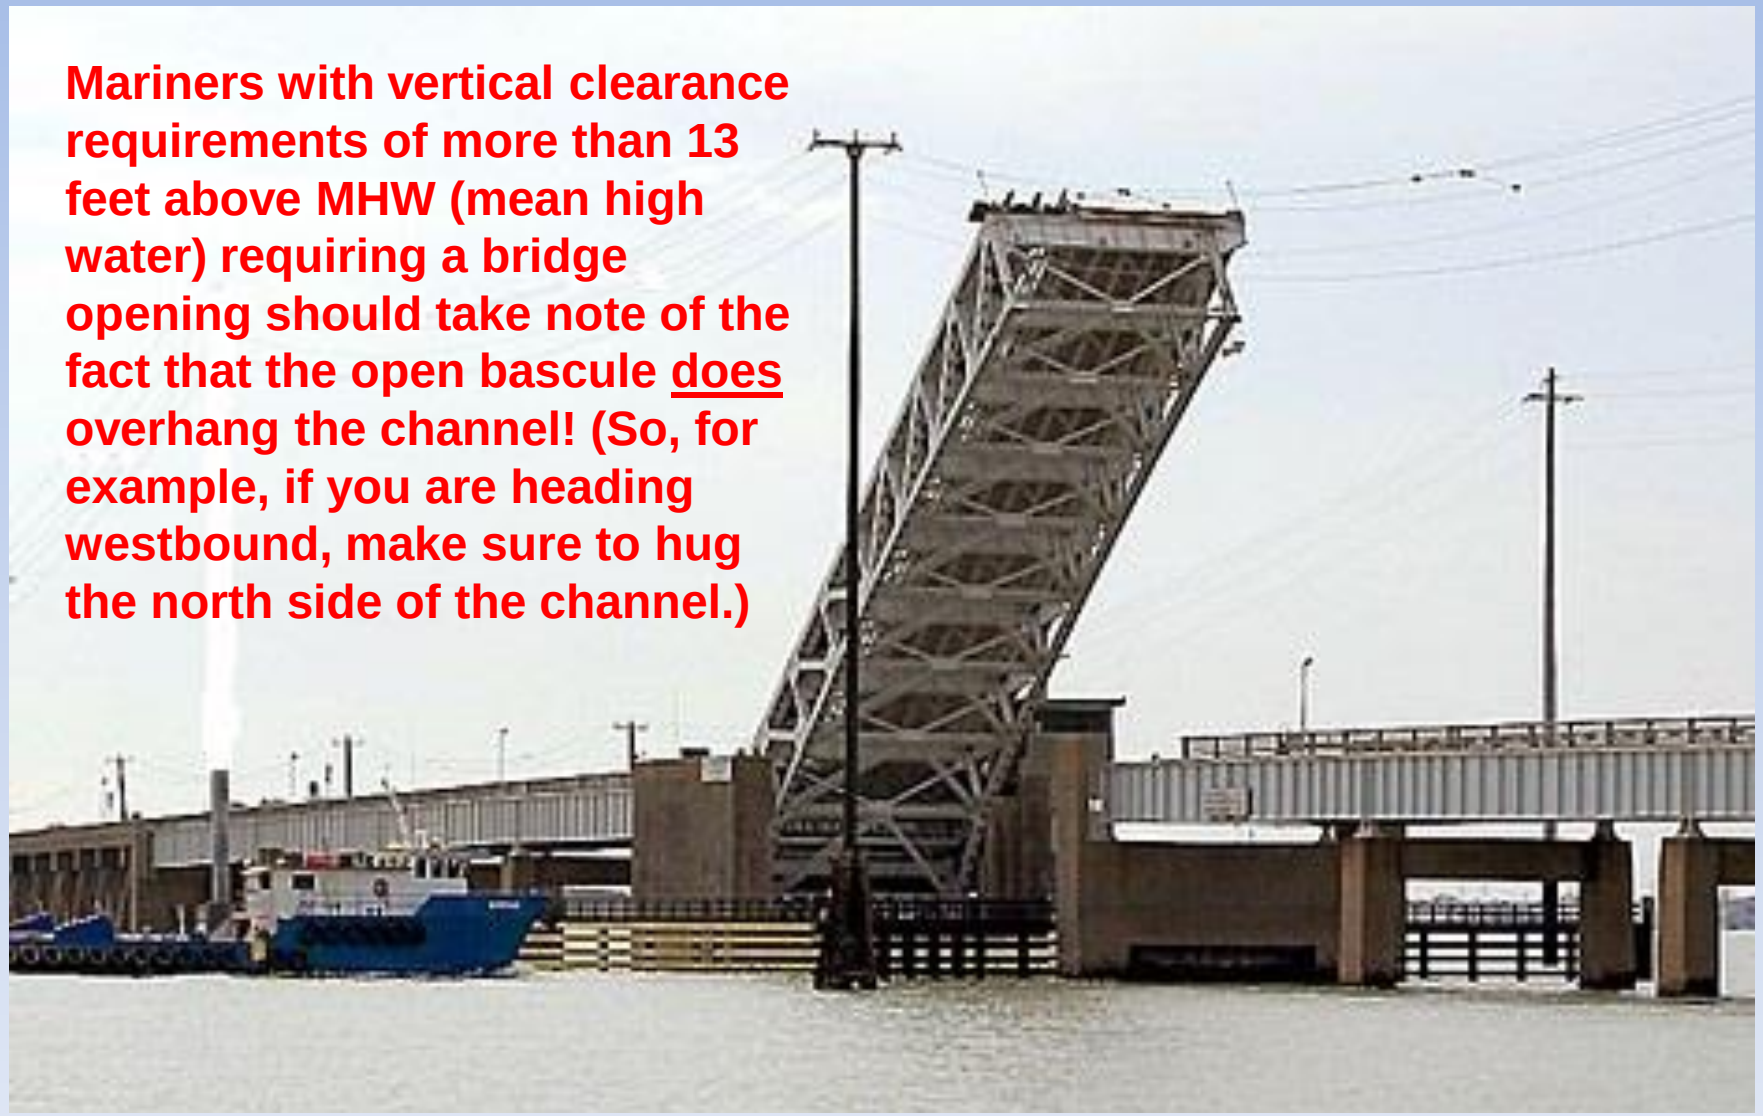
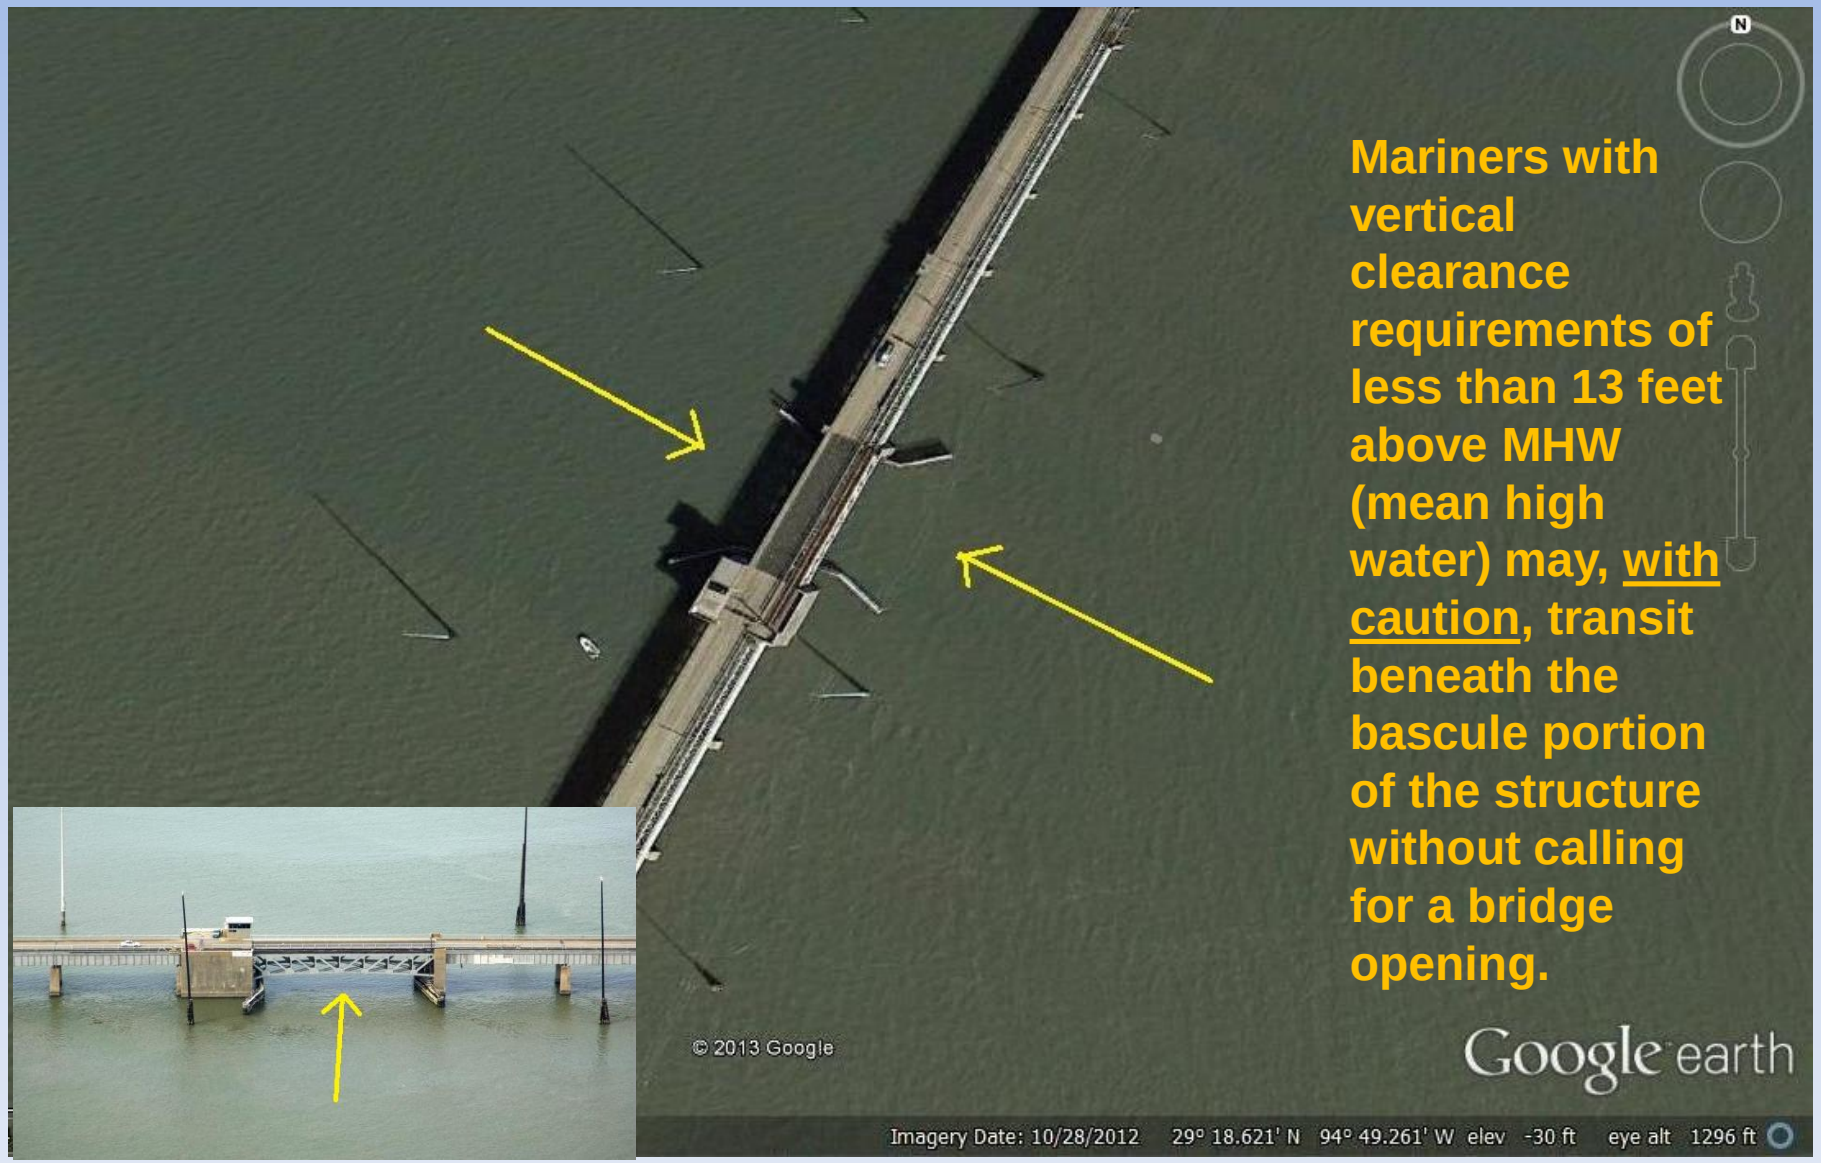
During 2014 the bridge was closed for major repairs on its mechanical components to improve operation and safety, but these repairs have now been completed and the bridge is operating again at the beginning of 2015.

This is the information for normal bridge operations.

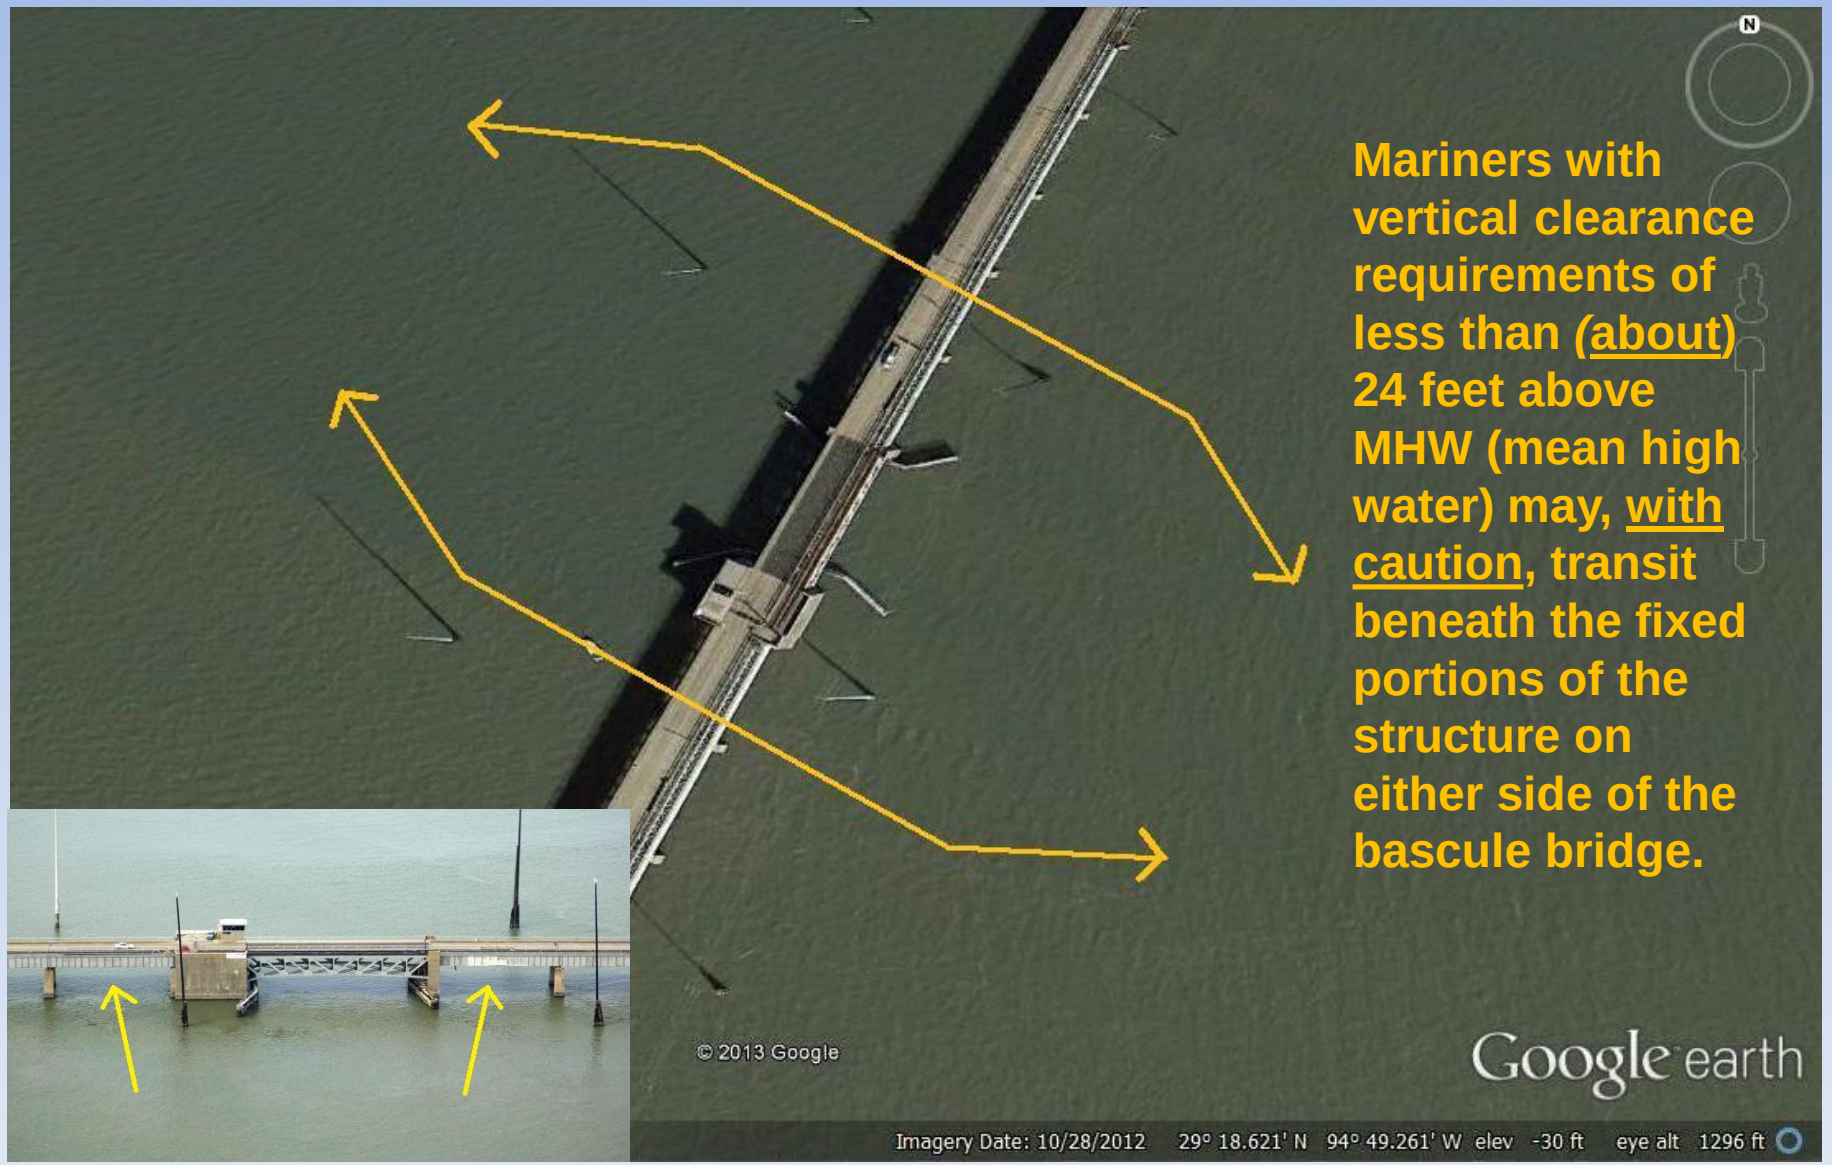
This is information for tall vessels requiring a bridge opening.



This is information for smaller vessels not requiring a bridge opening.



This is information for larger vessels that <u>may</u> not require a bridge opening.



Water depths under the fixed spans are sufficient for safe transit for small boats.
